Examiner's Amendment

1. An Examiner's Amendment to the record appears below. Should the changes and/or additions be unacceptable to applicants, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it must be submitted no later than the payment of the Issue Fee.

Please change the following:

In the claim:

Cancel claims 5-27 (which are drawn to non-elected pieces of inventions)

In claim 1, line 12, change “having” to —*including a pair of the permanent magnets, said permanent magnet pair being arranged to define a center point and opposing end points thereof—*

In claim 3, line 12, change “having” to —*including a pair of the permanent magnets, said permanent magnet pair being arranged to define a center point and opposing end points thereof—*

Without reciting that each of the rotor magnetic poles including a pair of magnets, it is unclear how the center point and the opposing point of a rotor magnetic pole being defined. As disclosed in the application's page 23 and shown in FIG 1, a pair of plate-like permanent magnets (26) are abutted end-to-end to form a single rotor magnetic pole and, since four permanent magnets are employed in the rotor, two rotor magnetic poles are formed, and “T4” represents the interval between the neighboring slots (23) positioned adjacent a center point and the intervals “T2” and “T3” at one of the opposing ends of the rotor magnetic pole are chosen to be smaller than the interval “T4”.

Art Unit: 2834

Thus, in light of the spec, the above changes in claim 1 and 3 are made by the Examiner's amendment to resolve the indefinite issue in the claimed language.

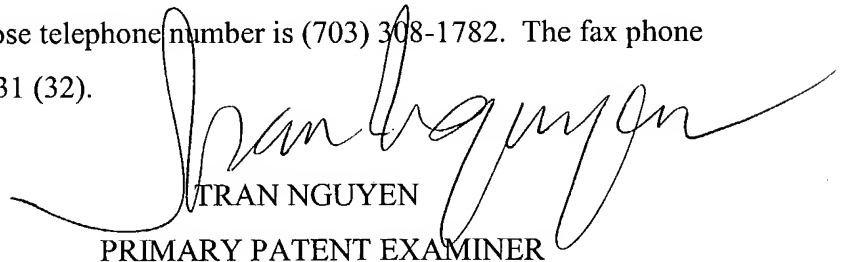

Should the changes and/or additions be unacceptable to applicants, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it must be submitted no later than the payment of the Issue Fee.
